NEW HYBRID TEA ROSE ETOILE de FRANCE

(STAR OF FRANCE)

(See illustration in colors
on front cover page)

THIS is undoubtedly the most magnificent new Rose introduced for many years; it is a strong healthy grower, quite hardy and a quick and abundant bloomer, makes beautiful large pointed buds and extra large fully double flowers, $3\frac{1}{2}$ to $4\frac{1}{2}$ inches across. Color, very bright dark rich crimson, exceedingly handsome and sure to take first place among the finest roses in cultivation. Its hardiness, vigorous growth and freedom of bloom make it particularly valuable for planting in the open ground, while the large size, exquisite color, and the delicious fragrance of its buds and flowers make it especially desirable as a cut flower and forcing Rose. We believe, in fact, it has few equals in all around good points and is well worthy to be considered one of the newest and finest Roses in cultivation to-day. Strong plants, 35 cts. each; larger size, 50 cts., postpaid. Two-year size, 75 cts. each, express, or \$1.00, delivered.

On Special Offers, Collections, nor items bought at dozen rates or seeds by weight or in bulk, but customers may select premiums on all things bought at single rates as follows:

On \$1.00's worth of goods bought at single rates, select to the value of . . .		\$.15 extra.
2.00	These premiums cannot be allowed on Special Offers, Collections or goods bought at dozen rates or seeds in bulk	.30 "
3.00		.50 "
4.00		.70 "
5.00		1.00 "
6.00		1.20 "
10.00		2.50 "
11.00		2.75 "
20.00		6.00 "
25.00		7.50 "

Caution Prices on goods sold at special rates (i. e. by the dozen, 100, or in special offers), are already as low as we can afford, hence, on goods bought at these rates no further Premiums can be allowed.

Free by Mail All the items in our catalog, which are priced "postpaid," will be delivered free by mail. This includes everything that can be safely sent by post. Even to most distant countries, such as India, So. Africa and Asia Minor, we ship this way with marked success.

ORDERS BY EXPRESS

Two-year old roses, large size shrubbery, fruit trees, etc., are too large to mail and must be sent by express. We recommend that customers instruct us to ship smaller sized plants also by express, when in our judgment it is best to do so. We can send larger plants this way and can leave most of the earth on roots, which is of course much better for our customers. **Express Charges must be paid by the purchaser,** unless otherwise agreed. But we are careful to pack as light as safety of the plants will permit and add as many extras as we can afford to help cover charges, and since the expressage on plants, bulbs, etc., is now 20% less, than regular merchandise rates, the cost of sending goods in this way, even to distant points, is quite reasonable.

The Cost of Express Charges

you can estimate quite closely with the following schedule. Use the rate named for the town nearest you and count the weight of two-year old plants when packed ready to express about as follows: 12 plants=15 lbs.; 25 plants=30 lbs.; 125 plants=100 lbs.; plants one year old 20 to 30 lbs. per 100 plants.

Express Charges to the following Points are as follows:

Alabama	Montgomery	\$3.60	\$0.70	\$0.35

West of the Rocky Mountains, the express rate on plants is from 10 to 12 cts. per lb.; but charges when prepaid are only 8 cts. per lb. To save themselves unnecessary expense, therefore, we recommend customers living in that section to remit with their order sufficient money to prepay express. If too much be sent we will refund the difference at once.

Foreign Countries By express we can ship goods to any part of the world if the party ordering will name some one in New York to receive and forward the goods and prepay ocean freight.

Further information and rates will be cheerfully furnished on application. See also Note on Page 7.

THE CONARD & JONES COMPANY

Rose and Flower Growers,

WEST GROVE, PA.

ALFRED F. CONARD

President of
THE CONARD & JONES CO.

WEST GROVE is not a large place, yet there are few if any countries on earth where flower lovers do not know that it is the place to send to get good Roses. It was in West Grove that the American Rose Growing Industry had its beginning and it is here we believe that it has reached its highest standard of excellence. During the intervening period of now nearly half a century, there is probably no other name that has been so prominently identified with the growing of Roses as that of **Alfred F. Conard**. He was a pioneer in the business and always has insisted upon his customers having the best. It was he who developed the idea of sending these sturdy "own-root" Roses safely by mail, thus bringing them within the reach of people everywhere, and then with earnest energy and the aid of Antonie Wintzer perhaps the most skillful rose grower living, he faithfully devoted himself to building up a business for furnishing the

"Best Roses in America"

To-day, in co-operation with its President, everyone of the firm is taking an active personal part in the conduct of the business which is thoroughly organized and equipped with the best of modern improvements. With the aid of carefully trained assistants, competent heads are in charge of each department, and throughout the establishment there exists a stronger-than-ever desire to out-strip all former records in giving "First-class stock" and "Satisfaction to Customers."

SINCE 1869 the entire business career of our President (Alfred F. Conard) and Vice-President (Antoine Wintzer) has been devoted to the Growing of Roses. They were pioneers in this industry and as President and Superintendent respectively of their company, were the first to grow, sell and ship "own roots" roses on a large scale. In the intervening years since then millions upon millions of sturdy young rose plants have been sent out from West Grove to all parts of our country, and it is under the direct supervision of Mr. Wintzer and Mr. Conard that most of these Roses have been grown and sold. The consequent experience and ability of these two men were an excellent asset for the present firm which was organized and incorporated in 1897, under the new name of The Conard & Jones Company. Our Treasurer and Secretary, S. Morris Jones and Robert Pyle, are responsible business men representing ample capital and well known in this community. With an extensive block of new greenhouses provided with all the modern improvements for heating, ventilating, etc., and with a skilled corps of young men trained under our methods, our West Grove Floral Nurseries are now established with facilities unexcelled

New Roses:

Prominent hybridizers know that we are on the lookout for New Roses and come to us with their novelties. Mr. Wintzer, our Vice-President, has himself developed several, so that we are constantly having new kinds from which we select the best for introduction. Thus, during the past five years we have brought out the following which have taken first place among the standard roses of to-day: The New Crimson Rambler "Philadelphia," "New Century," "Royal Cluster," "May Queen," "Ruby Queen," "Pearl Queen," "Clara Barton," "Sir Thos. Lipton," "Magnafrano," "Beauty of Rosemawr," and "Birdie Blye," (see index, page 46.) We also import each year all the prominent New Roses from European growers, which, together with new American introductions, are quickly added to our list as fast as they appear. These we test, keep the best, discard the rest and thus keep our assortment always up to date and yet a safe one to order from.

Our Aim: Rose growing is almost a hobby with us, and our constant aim is to supply the Best. It costs us more to grow this kind, for they require more room, more time, more care, and everything must be done thoroughly. But the experience of a lifetime has shown us "HOW" and we do not skimp.

When next you hear any one asking for dependable Rose Growers who sell good stock, please remember these points about C. & J. Roses. You will not find better anywhere and few so good. Respectfully,

WEST GROVE, PA. January 5th, 1906.

THE CONARD & JONES COMPANY.

Send in Your Orders Early so we can set your plants aside and have them ready to ship at proper time. This will be not only a wonderful convenience for us, but will insure for yourself the best stock obtainable.

You can have 2-Year old Roses, Delivered Free by Express if you order 5 or more to come at one time and add 10c. each for expressage. (If you should thus send any excess over actual cost to us, we will promptly refund the difference.)

"One-Year Old Roses" Usually greenhouse grown, but well hardened with strong roots and bushy tops from 6 to 15 inches high, according to variety. They bloom freely the first Summer.

"Quick-Blooming Roses" are a special grade, larger and finer than one-year old but not so large as two-year old. They are especially prepared to bloom quickly and freely and they do it. Please read more about them, page 24.

"Two-Year Old Roses" are the regular large size and should bloom abundantly the first year. If not otherwise stated they are greenhouse grown with specially fibrous roots and well branched tops from 1 foot to 2½ feet high (size depends much upon the variety and habit of growth). Please see page 46. Some kinds can be supplied in field-grown dormant plants.

“Extra Size 2, 3, and 4-Year Old Roses” For the most part dormant field-grown plants—the largest sizes sold. See pages 34 to 39 and 44.

FOR INFORMATION ABOUT HOW TO SHIP,
PLEASE SEE PAGE 5.

C. & J. QUICK-BLOOMING ROSES

WE WANT all our friends to try our Special Grade Quick Blooming Roses, as offered in the following list. They are especially selected early-flowering varieties, grown last season and kept dormant over winter, and then repotted in larger size pots, which makes stout, stocky plants with an abundance of strong working roots, in best possible condition for vigorous growth and quick bloom. They should be planted as early as possible after the frost is out; rough weather will not hurt them, and the earlier they are planted the quicker and better they will bloom. There are no roses equal to these for quick and satisfactory bloom.

They cost a little more than the ordinary size, but are worth twice the difference, and are sent postpaid by mail at the prices stated. They are so hardy and vigorous you cannot easily kill them or keep them from blooming.

Do not fail to give them a trial this season. Order to-day and we will send whenever desired.

Beautiful New and Rare Climbing Roses

NO HOME lawn seems quite complete without its climbing roses. They add so much to the pretty decoration of a porch, archway, or trellis. And such a splendid assortment as we now have makes ordering easy and success most sure. The Ever-blooming Roses on four pages following must not be confused with the Annual Climbers, which bloom but once a year.

These Ever-blooming Climbing Roses "keep everlastingly at it" all Summer through, and except the list of roses for the south, will Winter nicely where the thermometer is not accustomed to get below zero; where it is colder they should be taken down in the late Autumn and covered with soil. They require but little pruning. ("Birdie Blye" does not climb as high as the others, but is a Pillar Rose.)

Please note, prices are no more than for bush roses, but these will grow larger and give more blossoms and altogether prove one of the most satisfactory investments you can make. Try a few, at least.

Beautiful New Ever-blooming Pillar Rose

"BIRDIE BLYE"

Introduced and For Sale only by
THE CONARD & JONES COMPANY
WEST GROVE, PA.

This splendid rose originated in 1900 and is the result of a cross between "Helene," a fine hardy climbing rose of the Crimson Rambler type, and the popular Tea Rose "Bon Silene." It forms a fine, handsome bush 3 to 4 feet high with glossy foliage and blooms constantly from early June till freezing weather, producing at the end of every shoot, clusters of bright, satiny rose blossoms, quite double, intensely fragrant, and over 3 in. in diameter. The buds are long and pointed and in color a bright carmine until they open.

It is exceedingly hardy and may be planted almost anywhere in the temperate zone (does well in the south also).

By special permission we have named this splendid Rose in honor of Mlle. Birdie Blye, she whom the great Rubenstein declared to be "the coming great American Pianist" and who along with her fame has won the love and admiration of thousands of musical folk throughout this country and Europe.

We have adopted her more popular name of "Birdie Blye" and deem ourselves most fortunate in being able to offer a rose that is also destined, we believe, to take a foremost place in the hearts and homes of the American people. Plant it in rich soil and full sunlight.)

PHILADELPHIA RAMBLER

The New Crimson Rambler "PHILADELPHIA"

Introduced by The Conard & Jones Co.,
West Grove, Pa. (1902.)

**The Most Magnificent Hardy Crimson
Climbing Rose in existence.**

SPLENDID Flowers, $2\frac{1}{2}$ inches across and perfectly double. Borne in grand clusters, completely covering the whole bush. Color, pure deep rich crimson, far brighter and more intense than the old "Crimson Rambler," which has heretofore been the standard for brilliant color. The "PHILADELPHIA" does not fade, bleach or wash out, but holds its bright dazzling color to the last, which adds greatly to its value. Has handsome foliage; does not mildew, and is a most abundant bloomer. Undoubtedly the brightest and best of all Hardy Crimson Climbing Roses yet produced; unequalled for covering porches, trellises, screens, fences, etc. Is a strong, quick grower, perfectly hardy, needs no Winter protection and bears "Bushels of Roses" every season without attention. Makes a great sensation wherever seen. People declare they never saw such immense quantities of Roses BORNE ON ONE BUSH, or any flowers of such bright, dazzling crimson color. **No mistake about it.** The "Philadelphia" is the finest, Hardy Crimson Climbing Rose yet produced.

The above is what we said about this Rose when we introduced it three years ago. Since then we have watched it closely and are more enthusiastic over its fine qualities than ever. We have sent out thousands to our customers all over this country and abroad, and Philadelphia Rambler is everywhere recognized as the **Best Hardy Climbing Rose** there is.

In England last year, Philadelphia Rambler was awarded a "CERTIFICATE OF MERIT" at the great London Temple Flower Show, which is the finest of all the English Horticultural Exhibitions.

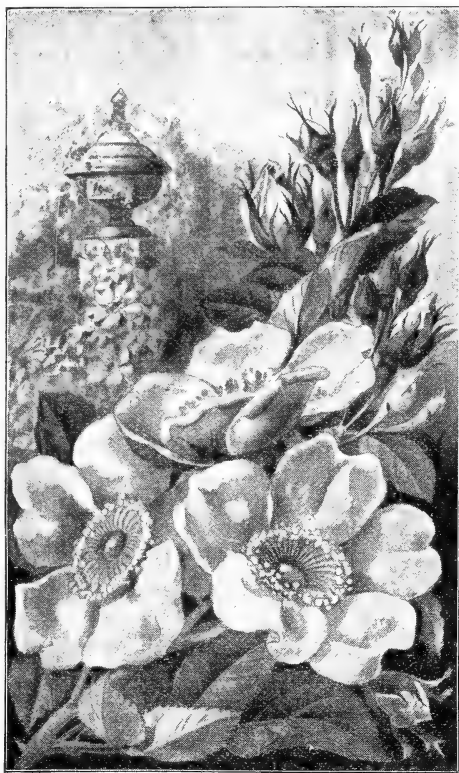

"The Garden"—One of the leading Horticultural Journals of England, under date of August 26th, 1905, says of "Philadelphia Rambler:"

"This is a splendid addition to the rambler roses, being FAR SUPERIOR TO CRIMSON RAMBLER, which is saying a great deal. The flowers are deeper in color, larger and fuller and do not present such an untidy appearance when fading, a great drawback with Crimson Rambler. The Philadelphia Rambler seems in every way adapted to covering pergolas, the sides of rustic bridges or stumps in the open. Seen at a distance its color is most effective."

(Signed) GEORGE BURROWS.

NEW ROSE "AMERICAN PILLAR"

NEW HARDY CLIMBING ROSE "American Pillar"

Introduced (1906) and for sale only by

THE CONARD & JONES CO.

WEST GROVE, PA.

IF EVER there was a rose constituted to stand the trying conditions of our American climate, we have it in this unique New Hardy Rose described below.

We have tested American Pillar severely, and believe it to be one of the hardiest roses grown. Will thrive in poor soil as well as rich and insists on growing vigorously. It has stout thick curving branches, rather thorny but furnished with an abundance of glossy dark-green leaves. Each stem has 9 leaflets instead of the usual 7 or 5, a kind of double supply which gives the bush a very rich effect. It is one of the first to start growth in the early Spring and here holds its leaves of lively green till far past Thanksgiving Day, and never have we seen it troubled with insects. In early June it begins to bloom; large single flowers measuring 3 to 5 inches across and very durable. They are borne in immense clusters and make a remarkable sight. The color is a chaste shade of pink, while in the centre of each flower is a large cluster of bright yellow stamens. In the Autumn the bush becomes covered with pretty clusters of brilliant red fruit. These seed hips hang on through the Winter to brighten the bushes and feed the birds. "American Pillar" is truly a record rose, one of the most ornamental and satisfactory we have ever introduced.

PRICE.—25 cts. each, or larger size, 35 cts., postpaid. Two-year, 50 cts.; extra size, two-year, 75 cts.; three-year, largest field grown plants, \$1.00 each, by express. \$1.25 delivered.

TWO RAMBLERS, ONE CRIMSON AND ONE WHITE

3 "Queen" Roses

A Choice Trio of Hardy Climbers

If you live North where roses sometimes Winter-kill you will be delighted with these perfectly hardy Queen Roses. They are loaded down in the early Spring with the loveliest and most beautiful roses imaginable. Flowers three inches across, full, double and deliciously fragrant. Every one who has tried them praises them and we consider them three of the most valuable climbing roses we ever introduced. For planting along a wire fence, stone wall, trellis, etc., they are unsurpassed and where planted together the three colors harmonize beautifully.

[Dean Bond, a true lover of beautiful roses, wrote us from Swarthmore, Pa. last May: "We are having a feast of roses these days, very beautiful. The RUBY QUEEN is just coming into bloom and is a sight to see." Dean Bond has this rose growing among some 300 others. The Queen Roses nearly always attract special notice.]

MAY QUEEN

Splendid large double roses of clear bright pink and deliciously sweet-scented. Blooms tremendously. Literally bushels of flowers can be picked from a fully grown bush.

PEARL QUEEN

Pearl white with blush centre. Almost exactly like the beautiful Malmaison; large, double and sweet.

Hardy Memorial or Evergreen Roses

Especially recommended for Cemetery Planting

SOMETIMES called the *Wichuraiana* Roses but appropriately classed as "Memorials" because everywhere acknowledged to be the most suitable and satisfactory roses one can get for cemetery planting. They will climb when trained, or if left alone they creep along the ground as closely as an ivy and make a dense mat of shiny dark green foliage. The leaves are of leathery texture, practically insect proof and remain green on the plants nearly all winter. They bloom in profusion during June and July and the single ones bear red berries in the autumn. A growth of 10 feet in a season is not unusual and all are entirely hardy and when once planted take care of themselves. They are excellent for training over graves or over rough ground, rocks or stumps. Some prefer them to the Hardy Climbing Roses for covering arbors, fences, archways, etc., because their foliage is so attractive and stays green till midwinter. (See prices below.)

Hardy White Memorial Rose Wichuraiana—This is a leader in more ways than one. Is hardy as grass, will grow in sun or shade, poor ground or rich. Makes a beautiful display of blossoms, single and very large (often 5 or 6 inches around) pure satiny white with bright golden centre. Should be in every collection. (Prices below.) See cut.

Single Pink Memorial, Pink Roamer—The flowers are single and from two to three inches in diameter, rich pink with silvery white centre and orange-red stamens; exceedingly fragrant and picturesque.

South Orange Perfection—Belongs to the same class as the above, blooms freely in clusters. Color, rosy blush, changing to white; the flowers are perfect roses in form.

Prof. C. S. Sargent—A beautiful Rose of delicate buff with centre of deep golden yellow; flowers of fine form, very double and 2½ inches across; delightfully fragrant. 20 cts. each, postpaid. Two-year size, 40 cts. each, by express.

* **Double White Memorial Rose (Manda's Triumph)**—The flowers are medium-sized, perfectly double to the centre, pure white and very fragrant. The plant is an erect grower, has handsome dark-green foliage, is entirely hardy and bears its lovely flowers in large clusters.

* **Double Pink Memorial Rose (Universal favorite)**—

ROSE WICHURAIANA

same as the double white, except in color, which is clear, bright pink; equally as beautiful as the double white, and a charming companion for it. Price, 15 cts. each; larger size, 20 cts. Will send one double white and one double pink, the two for 25 cts. Two-year size, two for 60 cts., postpaid.

New Red Leaved Memorial Rose, Alba Rubifolia (C. & J. Co., 1900)—Has large double pure white flowers and bright shining evergreen foliage, tinged with bronzy-red. May be used as a creeping, climbing or weeping rose.

3 New Hardy Creeping or Trailing Roses 3

These pretty varieties are **Hybrids of Wichuraiana** and some think them quite the finest thing in their class. They have the same attractive appearance and unique habit of growth, will creep gracefully from a vase or climb up from the ground and cover anything you plant them near. They need no winter protection.

HARDY "IRONCLAD" RUGOSA ROSES

THESE Hardy Rugosa Roses and their Hybrids seem just suited for our North American climate, as they are so tough. They make dense, sturdy, compact bushes, 4 to 6 feet high and very ornamental. Their dark, rich, leathery foliage is oddly wrinkled, shiny and remarkably free from insect pests. Some bloom all Summer, others but once, but are followed in the Autumn with a profusion of beautiful orange red or crimson fruits. The plants are hardy as oaks, and do well in the most trying places, seashore, mountains or anywhere. Excellent for making hedges or planting on the lawn with shrubbery or in isolated groups. Rugosa Roses on their "Own Roots" are scarce, hence higher in price, but we offer only "Own Root" stock of these, because they give so much better satisfaction than "Budded Plants," and really cost less in the long run. *If you want something unique, appropriate and permanent, try below set of six on your lawn.*

Sir THOMAS LIPTON (WHITE CENTURY)

WE have had this splendid rose on trial for several years, and take pleasure in recommending it as the *finest Pure White Hybrid Rugosa Rose yet produced*. It is a strong vigorous grower, making a handsome bush, 4 to 5 feet high. The flowers are 3 to 4 inches across, *perfectly double* and pure snow white. They are very fragrant and borne on strong upright stems all through the growing season. It is one of the *Hardiest Roses in existence*, and therefore particularly valuable for planting in cold climates and exposed localities where other roses do not thrive. It is especially recommended for yard, park and cemetery planting, because of its handsome appearance, perfect hardiness and entire freedom from insects, rust and disease.

PRICE—Good Mailing plants, 25 cts. each; larger size, 35 cts. each, postpaid. Two-year bushes, 50 and 75 cts. each. Extra three-year bushes, \$1.00 and \$1.50 each, by express.

NEW CENTURY (Double Pink)

This magnificent New Rose is the result of a cross between the lovely Ever-blooming Rose Clotilde Soupert and the Hardy Rosa Rugosa Alba. The flowers are 3 to 4 inches across, perfectly full and double and borne in elegant clusters. The color is a clear flesh pink with bright red centre and having all the petals widely bordered with fine creamy white; it is very sweet and has the delightful fragrance of the wild rose or sweet briar. It has been called the "Iron Clad" Ever-Blooming Rose, for besides being perfectly hardy it is entirely free from the attacks of insects, rust or blight, and is a real iron-clad continuous blooming rose, entirely different from the old ever-blooming varieties, and having a different style of beauty. It should be planted in good rich ground and kept well manured to induce vigorous growth and continuous bloom. Price, strong 1-year plants, 20 cts. each; larger size, 25 cts., postpaid. Fine two-year bushes from pots or open ground, 35 cts. each. Extra size three or four-year bushes, cut back ready for planting, 50 cts., 75 cts., \$1.00 each, by express.

Fruit and Foliage of Rugosa Rose

Hardy Hybrid Perpetual Roses

THE Hybrid Perpetuals are considered the most valuable of all roses, because they bear the largest, sweetest and most brilliant colored flowers, and are so hardy and vigorous they live over Winter without protection, and continue to bloom regularly from year to year. Their grand flowers are of all shades of red, crimson, scarlet, pink and white, but no yellows. They thrive and bloom finely in all sections of the country and should generally be planted in open ground, as but few varieties are suitable for house culture. Some kinds do not bloom till the second year, but when fully established bloom regularly at the usual time, and occasionally during the Summer and Fall months. Though called "Perpetual," they are not constant bloomers but are the finest and most beautiful of all Hardy Roses.

HARDY
HYBRIDPerpetual Roses FOR GENERAL
PLANTING

GENERAL JACQUEMINOT

The Premier Hardy
Crimson Rose

Famous the world over as one of the most magnificent Hardy Crimson Roses ever introduced. It is a strong vigorous grower, entirely hardy, an early and abundant bloomer, and both buds and flowers are considered models of perfection, and its brilliant shining crimson color is the standard of color by which other roses are judged. In fact, it is almost unequalled in beauty of form and brilliant intensity of color. It is not a new variety, but so valuable that it is frequently scarce and difficult to obtain, as almost every one wants a "General Jack." This year, however, we believe our stock is ample, and hope to have enough to meet all demands.

LARGE HARDY FIELD GROWN ROSES Budded Plants

SPECIALLY SUITED FOR PLANTING IN OPEN GROUND

AS THERE is a heavy demand for large hardy field grown roses, we have made increased provision for this grade of stock, and customers can rely on having all their orders filled in the most satisfactory manner; they are large thrifty bushes, 2 to 3 feet high, according to variety, and just the kind you want to make a good appearance at once and bloom finely the present season. Plant as early as possible in Spring so they can get a good start before hot weather, set a little deeper than the plant has grown, tread the earth firmly on the roots, and if suckers start from the roots keep them rubbed off as fast as they appear. The varieties listed below are among the very best for this climate and we give purchasers their choice of varieties as far as possible, but when any varieties asked for can not be done, request permission to put in other similar sorts of equal value without further instructions and always guaranteeing full satisfaction in every way.

SOLEIL D'OR—"GOLDEN SUN"

This is a truly magnificent rose and one of the grandest varieties in cultivation. It is a cross between Persian yellow and Antoine Duchere, but is entirely distinct both in habit of growth and color of flower. It is a strong robust grower with stiff straight branches and heavy deep green foliage, the flowers are very large and globular, perfectly full and double and petals so thick and leathery, it has great substance, and is remarkably durable. The color is entirely different from any other variety in cultivation, a mixture of reddish gold, orange yellow, nasturtium red and rosy pink, a combination very difficult to describe—except in the name, "Golden Sun." No description can do justice to the rare and wonderful beauty of this splendid new hardy yellow rose. It is entirely hardy, needs no protection and will bloom regularly every year, the only difficulty about it is, it is so difficult to propagate on its own roots, that we can now only offer strong two-year budded plants grown in open ground. Price, dormant plants (up to April 1st), 40 cts. each; after that date, potted plants, 50 cts. each, by express.

CANNA LILIES

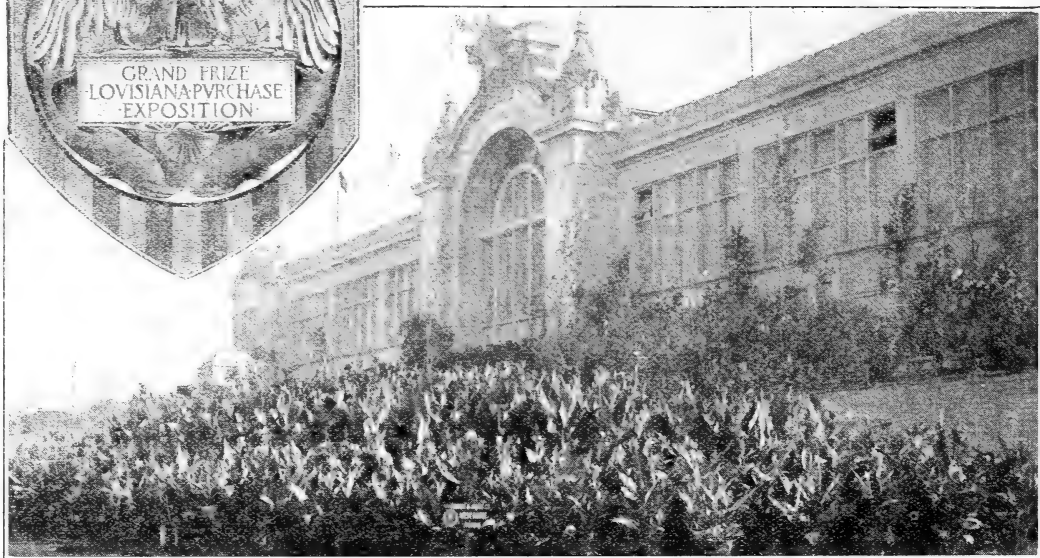

C. & J. Canna Lilies (not to be confused with the old-fashioned flowerless kind) are a distinctly new strain, producing great masses of large lily-like flowers all Summer long and gorgeously beautiful. "King of Bedding Plants" is a title they have, and richly deserve. They begin to bloom by the end of June and never stop till frost. The flowers are a veritable blaze of color in every shade imaginable (except blue) and either plain, dappled, edged, striped or variegated. Plants range in sizes from 2½ to 7 feet high with foliage of green or bronze often striped like some rare tropical plant. So you see they are suitable for planting in beds of all possible shapes and sizes or for placing along fences, walls, porches or driveways, for screens, hedges and border plants. (See our Suggestions, page 53.) They grow most anywhere, but do best in rich soil. We send full cultural directions with every order and also tell you how to keep the roots over Winter. Canna Lilies ordered early should be started indoors. Plant out when the ground is warm (say May 10th in this latitude). Easy to grow and multiply rapidly. Try some.

At the **St. Louis World's Fair 1904**

C. & J. Canna lilies came into direct competition with exhibits of the leading firms of this country and Europe, and the judges were unanimous in awarding (**Highest possible Award**) the

GRAND PRIZE

TO THE CONARD & JONES COMPANY, WEST GROVE, PA.

One of the 25 Canna Beds in our Exhibit at St. Louis World's Fair.

New Grand Prize GIANT FLOWERING "Louisiana" CANNA LILY

At the Louisiana Purchase Exposition, St. Louis, 1904, where all the finest Cannas were on exhibition—Louisiana was pronounced the finest orchid flowering kind in existence. The plant is a vigorous grower, producing a thick mass of glossy green foliage; and height nearly 7 feet; its flowers are like beautiful orchids; size often more than 7 inches across and every inch a vivid scarlet. It blooms tremendously, often 4 or 5 stalks flowering at once. You cannot conceive of anything more gorgeous. Its intense beauty and brilliancy are simply indescribable. Get one and watch it.

Price, strong potted plants, 50 cts. each; 6 for \$2.50, postpaid.

"THE HOME OF THE CANNA"

BY GEO. C. WATSON

"Next to that clever Frenchman, M. Crozy, the world owes more to a talented American, Antoine Wintzer, vice-president of The Conard & Jones Company, for the great advance that has been made in Cannas during the past fifteen years, than to any other one man." *Extract from "Horticulture," a Boston Journal devoted to Gardening, August 12th, 1905.* The C. & J. varieties represent the highest type of up-to-date Canna excellence. The largest and finest flowers, the greatest variety and brilliancy of color and the kinds best constituted to stand the trying conditions of our American climate. Our reputation has grown accordingly until to-day we are looked up as

Headquarters for High-Grade Canna Lilies.

From One of Our Customers.

July 25th, 1905.

THE CONARD & JONES CO.

Gentlemen:—

"While on the subject, I believe I have as great a variety as any one in the country. I have every Canna listed by your company, by — — — — — and — — — — —. In addition, I have perhaps ten varieties not to be obtained in the market, some of them of superb shading, habit and quality. In all, I have more than 100 kinds, the exact number I do not know, * * * * *. As a student of every Canna, I can truthfully say that you have the best offerings of any house in the country."

Very truly,

L. D. YAGER, Illinois.

It is because of the superior size, brilliancy and quality of our stock that expert judges and customers all agree that

C. & J. Canna Lilies are best in the World.

NEW and RARE CANNAS for 1906

All Originated and Introduced by THE CONARD & JONES CO.

As extensive originators and introducers of first class Cannas, we have made it our special aim to bring their standard of excellence to the highest possible point. Therefore, we are particularly careful, in introducing new ones, to select from our extensive list of valuable seedlings only those that have shown a decided superiority over existing sorts. Always send to us for the original stock.

Jupiter, (C. & J. Seedling No. 1571). We take pleasure in introducing this magnificent specimen of the Canna Race. Imagine a plant 6 feet high and furnished right down to the base with an abundance of deep purple foliage; some leaves 1 foot wide and 3 feet long, and nearly as dark as Black Beauty. Then add to this a beautiful mass of rich red flowers that crown the plant in a most effective and striking manner. Nicely potted plants, 50 cts. each, postpaid.

Venus, (C. & J. Seedling No. 1588). At the St. Louis World's Fair in 1904, this Canna attracted much attention altho' then unnamed. The color is a gay rosy pink with a mottled border of creamy yellow. It blooms splendidly with heads erect and flowers bright, because the old ones drop off fast as the new ones come. Has a good constitution, green foliage; height 3 to 4 feet. Nicely potted plants, 50 cts. each, postpaid.

Improved "Black Beauty" (1905)—

Black Beauty is well known for the magnificent color of its deep rich purple leaves; its flowers are insignificant. This improved variety retains the same beautiful foliage, but grows more luxuriantly and also bears bright red flowers. Attracted more attention at the World's Fair in 1904 than almost any other Canna there. Price, Dormant Roots, 25 cts, postpaid.

New Hybrid Orchid Flowering Canna, "Indiana" (1905)—

The foliage of this variety forms a solid mass of green 3 to 4 feet high, and above this the flower spikes shoot up to a height of 6 feet, each one bearing fine big clusters of orchid-like flowers. Color is a glistening golden orange daintily marked and striped with red. Single blossoms are often 7 inches across. Price, Dormant Roots, 35 cts. each, postpaid.

New Bronze Leaved Canna, "Chappaqua" (1905)—

Bears beautiful blossoms of wide rounded petals and fine form; color, rich scarlet blotched and spotted with deep maroon; handsome foliage of greenish bronze. Height, 4 to 5 feet and very handsome in every way. Price, Dormant Roots, 35 cts. each, postpaid.

"Black Warrior,"

A Sensation. The flowers of this Canna are almost black. It is a good mate for Mont Blanc. The color is rich, dark velvety maroon, with a centre shaded black. We watched one plant in good soil on our ground last season and estimated that it produced over one thousand blossoms. Height, 3 to 3½ feet. Dormant Roots, 25 cts. each, postpaid.

New Canna, "Harlequin"

The petals are blazing fiery red, dotted and edged with a deep band of brilliant yellow. The effect is truly dazzling. Harlequin is a vigorous grower, with green foliage. It is rather dwarf and nicely suited for planting along porches, walls and fences. Dormant Roots, 20 cts.

The Conard & Jones Co. 9-5-1905.
Gentlemen:—The ring of Cannas are the finest I ever saw, and are admired by everybody. They are now in full bloom.

Snowy White Canna MONT BLANC (See illustration above)

Mont Blanc was introduced by us in 1902 and is to-day by all odds the finest white Canna in commerce; in fact, there is no other variety that can compare with it. It has a vigorous constitution, blooms early and continuously in the greatest profusion during the whole growing season. Its foliage is bright glossy green, very large and handsome, and so thick and leathery it is not often injured by rain or wind. It is a strong-growing variety, and will produce from fifteen to twenty flower stalks in a season. Its great masses of snowy-white blossoms contrast finely with the splendid crimson and pink varieties, making the most gorgeous and showy flower beds for the lawn or garden it is possible to have. See illustration from photograph. Strong plants, 50 cts. each; \$2.50 for 6, delivered. See also above combination offer.

C. & J. Dependable Canna Lilies

All Introduced by the C. & J. Co., Except the Few Marked (*)

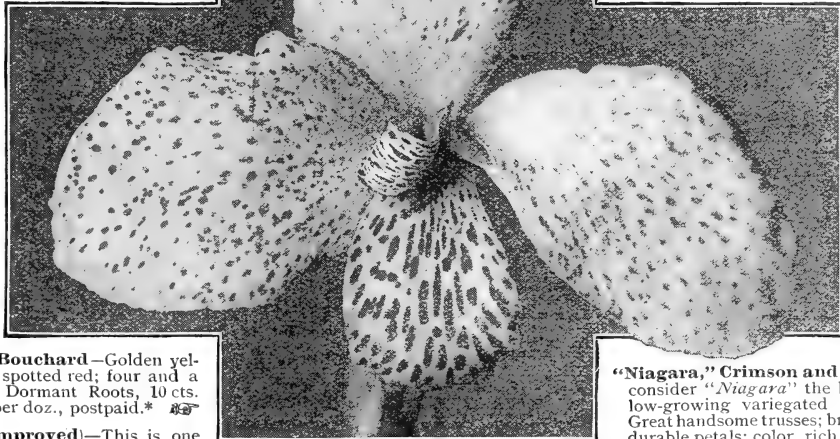

Gold and Yellow Shades

Creamy White Canna, "Alsace"—Has creamy white flowers and blooms throughout the season in fine shapely plants, three to four feet high. Until the introduction of our New White Canna "Mt. Blanc," "Alsace" was the nearest approach to a pure white variety. But it is still in great demand because of its low price and the magnificent and striking effect it produces when planted with other Cannas, especially in large rows and beds. 10 cts. each, postpaid.

Buttercup—True bright buttercup yellow; large beautifully formed flowers in fine large handsome trusses; stands unfavorable weather better than most any other kind and always shows up bright and clear, and is undoubtedly the best and most beautiful pure bright, deep canary yellow Canna in existence; height, three feet. Dormant Roots, 20 cts. each.

New Canna, "Cloth of Gold"—A golden yellow Canna on a dwarf plant with dark foliage is certainly an acquisition. Beautiful pure orange tinted with gold and coppery red; flowers are of good size and continue blooming all season. The plants grow only two to three feet high, have dark green foliage, striped and edged with brownish bronze, a splendid kind for the border of beds or almost anywhere. Price, Dormant Roots, 15 cts., postpaid.

Hardy Ornamental Shrubs

WHETHER you have a lawn of many acres, or an humble door yard, we commend this class of plants as indispensable to the real beauty of your home. If you select with care, you can have a succession of bloom from April to snow, to say nothing of the beautiful color, form and shadow effects of flowers, foliage and bright berries. For planting along border lines, filling in or rounding off angles or for screens to hide fences or other unsightly objects, you will find nothing more permanently pleasing than varieties listed below. They may be planted with equal success, either individually or in groups. (Arrange the low kinds in front.) Prepare the ground and maintain it as if for a crop of potatoes. Plant in the Fall or Spring about 4 feet apart and mulch with straw or leaves. Months indicate the time of bloom and the height in feet the size at maturity.

HEDGE PLANTS

Beautiful Hedges add so much to the appearance of a property, and are, everywhere, coming into more general use. They look better than fences, last longer and cost less; when once established, they require only a little cultivation and pruning each year to keep them the desired shape and size. A fence is more trouble, a hedge grows better-looking every year. (These plants are also used for individual lawn specimens.)

SOLANUM WENDLAND

Hardy Perennial Plants, or OLD-FASHIONED GARDEN FLOWERS

ONE of the chief delights that comes from owning a garden is in having flowers enough to give one's friends, as well as for house and table decoration. The beauty, variety and lasting qualities of Hardy Perennials make them especially useful as cut flowers. They are also equally valuable for adding brightness and color to the border beds, and a comparatively small collection will enable you to have some flowers in bloom all Summer through. They require almost no care at all, are perfectly hardy, and last for years, which makes the first cost almost the only expense. Thus as a class, they combine beauty, utility, and economy in a rare degree.

Prices Unless Otherwise Noted : 15 cts. each, 2 for 25 cts., or 12 for \$1.10, postpaid, 25 for \$2.00, and \$7.50 per 100, by express.

DIRECTIONS: We send you most of these in roots. Plant in the early Spring or Fall, allowing from 1½ to 4 square feet of space for each, (depending upon the size and character of the plant), unless otherwise noted. They will do well in any soil that will grow garden vegetables; it should be reasonably rich and spaded to a depth of 2 feet, to allow of good root growth. Keep down the weeds, and if you find any plants inclined to sprawl, put in a stake for support. After the first severe frost in the Fall, cut down the tops to within 3 inches of the ground, and give the bed a good coat of half rotted manure (this will both protect the plants and enrich the ground); dig this under in the Spring, before new growth starts.

ACHILLEA ALBA (The Pearl)

Hints on Growing Flowers from Seeds. Always buy C. & J. Surpassing Flower Seeds: they are the best. A dollar's worth of C. & J. Surpassing Flower Seeds will produce many times as many flowers as the same amount expended in plants.

Any ordinary soil will grow beautiful flowers. Make it fine and mellow, plant at proper time, keep clear of weeds, and Nature "will do the rest."

Do not plant when ground is wet and soggy, or it may bake so hard as to prevent the little plants from coming through.

Do not cover too deeply; very fine seeds should be merely pressed in with the hand; see printed directions sent with every order.

Do not allow plants to stand too thickly; weed out or transplant if necessary; if crowded they cannot bloom satisfactorily. A home adorned with beautiful flowers is sure to be happy and prosperous.

Transplanting. Nearly all flowers are improved by transplanting, except Sweet Peas, Poppies, Centaureas, etc., which are usually sown where they are to grow. By starting tender seeds in boxes, hot beds or cold frames and transplanting, you escape danger of frost and secure the earliest and finest flowers.

C. & J. Velvet Green Lawn Grass Seed

The best brand for seeding down new lawns and renovating old ones.

OUR VELVET GREEN LAWN GRASS SEED is not excelled by any for producing a smooth, even, velvety-green sward that will withstand drought and hard usage, and always make a handsome appearance. In seeding down a lawn or grass plot, three things are necessary to insure success: First, to prepare the ground so as to have a fine, smooth seedbed; second, to put on plenty of seed; never less, but rather more than the directions call for; third, to start the lawn-mower as soon as the weeds (which are always in the ground and sure to start first) are tall enough to catch, and keep them mowed off close till the grass has time to start and become well established. The seed should be lightly raked in and finished with a roller. Apply any good commercial fertilizer as a top-dressing when needed. One quart of seed is enough for three hundred square feet (fifteen by twenty feet), or at the rate of five bushels to the acre. Lawns should be kept neatly mowed, which induces a clean, even growth of fresh lively green.

Price by mail, postpaid 25 cts. per quart; two quarts for 45 cts.; in bulk, purchaser paying express charges, \$1.25 per peck; \$4.00 per bushel of 20 lbs.

THE WONDERFUL NEW ROSE

BABY RAMBLER

Madame Norbert Lavavasseur, or the Ever-blooming

Dwarf Crimson Rambler (See painting on back cover page.)

Prizes Won

BY

"Baby Rambler"

The Grand Silver Medal at Paris in May.

First-class certificate of merit by the National Horticultural Society in France.

First-class certificate by the Royal Horticultural Society of London.

First-class certificate by the National Rose Society of England.

Gold Medal by the Horticultural Society of Orleans and at St. Louis.

And numerous others.

THIS Rose is in many ways one of the most remarkable that has been introduced in many years. It is a cross between Crimson Rambler and Glory of Polyanthas, retaining the color of the former with the exceeding free flowering and dwarf growing habit of the latter. The plants are very vigorous and grow to 18 or 24 inches. The foliage is dark, glossy green and remarkably free from insects and fungus. The flowers are borne in clusters of 20, 30 or more to the cluster; in every way resembling the blossoms of the Climbing Crimson Rambler. (See color plate, painted from Nature on back cover page.) We have been growing this Rose indoors and out for three seasons and feel more enthusiastic about it than ever, it is perfectly hardy and blooms all the time indoors and from May to November outdoors. It is becoming very popular as a bedding rose, many people planting two or three dozen in one bed and getting a magnificent display of blossoms all Summer long.

We have an unusually large and fine stock of it in all sizes, including some of the largest field grown plants.

PRICES:

One year plants . . . 25 cts., each, 3 for 60c. 12 for \$2.00 }
Larger size . . . 35 cts., each, 3 for 90c; 12 for 3.00 } POSTPAID.

5 Magnificent Ever-blooming CANNA LILIES 75c.

"GLADIATOR SET" as shown on opposite page.

All originated and introduced by THE CONARD & JONES CO., West Grove, Pa., and all good kinds. For a brilliant mass of bloom all Summer long, in Rows, Beds and Borders, along driveways, buildings, or in any good sunny place, these Cannas are unsurpassed.

A big bed in one solid color (with perhaps another color for outside edge) we think makes the finest effect. Choose color you like best and order as per schedule on page 54, and we can guarantee you will have one of the most beautiful Flower Beds in your neighborhood.

If you store roots over winter you will have Cannas enough for two such beds the second year.

No. 1. "Gladiator," (Improved Florence Vaughn)—

Visitors walking through our Canna Fields stop short in front of "Gladiator" every time. It seems to insist upon being looked at. (See No. 1, in color plate next page.) It's a healthy plant, too, strong vigorous grower, with fine green foliage, and large heads of flowers that stand the storms and hot sunshine better than any other Canna there is, unless it be Buttercup,—five feet high and always looks cheerful. Price, 25 cts. each, 12 for \$2.50 postpaid, or \$17.50 per 100 by express.

No. 3. New Canna Lily, "Prince of India"—A beautiful

deep rich crimson, the most popular shade in this set. Undoubtedly one of the best Crimson Cannas yet introduced, certainly a beautiful shade of deep rich crimson and in full bloom all the time, only three feet high and particularly popular for any place where a low growing kind is desired. Green foliage and excellent everywhere. Price, 25 cts. each, 12 for \$2.50, postpaid, or \$17.50 per 100, by express.

No. 2. Fairest Pink Canna, "Betsy Ross"—(Named

after the illustrious maker of the first American flag, our Mrs. S. Morris Jones being a direct descendant). Is one of the loveliest, sweetest and most beautiful of all Pink Cannas yet introduced. About three feet. (Green Foliage) 15 cts. each, 12 for \$1.50 postpaid, or \$10.00 per hundred by express.

No. 4. California, Sometimes Called Klondike—A

rare and handsome color, a pure rich orange gold, no other like it. Has nearly all the good qualities combined, good habit of growth, large flowers, erect head and blooms freely. Height, 4 feet, and green foliage. A color that always looks well. Price, 15 cts. each, 12 for \$1.50, postpaid, or \$10.00 per 100, by express.

No. 5. "Duke of York"—Largest of the variegated

Cannas, and blooms prodigiously, coloring is exquisite, Foliage light green, very tough, and a strong grower. Height, 4 to 5 feet. Price, 20 cts. each, 12 for \$2.00, postpaid, or \$13.00 per 100, by express.

PRICES.—Above 5 splendid kinds (dormant roots till May 1st) 75 cts., or 5 potted plants, \$1.00, postpaid.

Special Offer: Order 2 each of above Cannas and we will add 1 Louisiana Canna entirely free—sending you entire 11 (dormant till May 1st,) for \$1.50 postpaid. See also 65 other New and Standard kinds on page 54.
